**THE LONG-AWAITED RIDE HOME**

**I**n September 2024, NASA astronauts Butch Wilmore and Suni Williams headed to space for what was supposed to be an eight-day mission. Due to technical problems, that expedition exceeded nine months. Despite the unexpected delay, Williams said the astronauts didn't feel stuck or abandoned. Instead, they viewed the extended voyage as an opportunity to do more research.

Almost 30 years ago, another astronaut also faced setbacks with her return trip to earth. Shannon Lucid had to stay at the Russian Mir space station six months because of hurricanes and various mechanical problems. Before catching a ride back home on the space shuttle *Atlantis*, Lucid said, "You can rest assured I am not going to be on the wrong side of the hatch when they close it."

Followers of Jesus need not worry about being on the "wrong side of the hatch" someday. Although the gate to heaven is narrow, Jesus himself is the way and leads us safely home.
